

Tangut Tibetan Transcription Scheme

Kelvin Yang

August 2026

This recreational scheme spells Tangut in Tibetan script. It is based on GX202411 and aims at a compact, natural Tibetan orthography.

一 Initials

Each GX initial is assigned a Tibetan nominal letter. Conditioned pairs such as *tś/tṣ* and *k/q* share one spelling because their distribution is recoverable from the rhyme grade. Derived *f*, *lh*, *ll*, *gh* use ོ. Complex stacks place all subjoined letters before ོ for shaping stability.

GX	Tibetan	GX	Tibetan	GX	Tibetan
p/ph/b/m	པཔབམ	t/th/d/n	ཏཐདན	k/kh/g/ŋ	ཀཁགང
ts/tsh/dz/s/z	ཅཆཨཐལ	tś/tśh/dź/ś/ź	ཅཆཨཐལ	v/l/y/r/h	ཕལཡརཏ
f/lh/ll/gh	ཕཐཏཐ	w/hw	ཡཏ	zero	ཨ

二 Vowels and grades

Grade	a	e	i	o	u	ə
III	ཨ	ེ	ེ	ོ	ུ	ེ
I	ཨའ	ཨེ	ཨི	ཨོ	ཨུ	ཨེ
II	ཨཨ	ཨེ	ཨི	ཨོ	ཨུ	ཨེ

三 Segmental and pan-syllabic features

GX	Tibetan	Function
n-/m-/ŋ-	འ-	nasal preinitial / marked series
-w- / -y-	འ / འ	medials
-w / -m	འ / འ	codas
-h	ཨ-	tense rhyme
r-···-r	ར-	retroflex rhyme
¹ / ² / ?	zero / འ / ?	tone

Although the scheme is based on GX, it also aims to preserve traditional rhyme-table categories. GX merges R.92 with R.100 and R.79 with R.101; the orthography therefore adds preposed འ- to R.100 and R.101. Automatic GX conversion defaults to R.92/R.79. Prefix the vowel with a backslash, as in *rtś\ər¹* or *rtś\er¹*, to request the marked spelling.

The Chinese edition supplies the complete R.1–105 inventory and the word, sentence, and paragraph tests. Question marks in that inventory indicate uncertain GX reconstructions; they are not copied into the Tibetan column.
