

Tibetan Transcription and GHC Correspondence

Kelvin Yang

August 2026

This chart compares the Tibetan structures used by the scheme with Gong Hwang-cherng's reconstruction (GHC). Tibetan spelling preserves rhyme-table categories, while GX and GHC give different phonological readings of the same orthographic features.

1 Vowels and grades

Tibetan	GX	GHC
ཨ	<i>Ca</i>	<i>Cja</i>
ཨེ	<i>Ce</i>	<i>Cjij</i>
ཨི	<i>Ci</i>	<i>Cji</i>
ཨོ	<i>Co</i>	<i>Cjo</i>
ཨུ	<i>Cu</i>	<i>Cju</i>
ཨཱ	<i>Cə</i>	<i>Cjɨ</i>
ཨང	<i>Cɑ</i>	<i>Ca</i>
ཨེ	<i>Cɛ</i>	<i>Cej</i>
ཨི	<i>Ci</i>	<i>Ce</i>
ཨོ	<i>Co</i>	<i>Co</i>
ཨུ	<i>Cu</i>	<i>Cu</i>
ཨཱ	<i>Cə</i>	<i>Cə</i>

2 Structural devices

Tibetan device	rhyme-table category	GHC result
postposed འ	Grade I	vowel series without <i>j</i> -
postposed ཡ	Grade IV	merged with Grade III in GX/GHC
preposed འ-	marked/column-2	corresponding long-vowel series
ར-	retroflex rhyme	final <i>-r</i>
superscribed འ-	tense rhyme	underdotted vowel
-མ/-ག	GX <i>-m/-w</i>	nasalized, <i>-j/-w</i> rhyme

3 R.79/101 and R.92/100

Rhyme	Tibetan	GX	GHC
R.79	ཨྱེ	- <i>er</i>	- <i>ijr</i>
R.101	འཨྱེ	- <i>er</i>	- <i>jiir</i>
R.92	ཨྱི	- <i>ər</i>	- <i>jir</i>
R.100	འཨྱི	- <i>ər</i>	- <i>jiir</i>

GX merges R.79/R.101 and R.92/R.100; this scheme preserves the traditional distinctions through the presence or absence of preposed འ. Sources: Gong Xun, Tangut phonology and GX202411.
